Mohamed Elgohary

Senior Front-End Developer

Cairo, Egypt | +201030085710 | melgohary.dev@gmail.com | github.com/melgohary-dev | linkedin.com/in/melgohary-dev

CORE COMPETENCIES & HIGHLIGHTS

- Senior Front-End Developer with 5+ years of expertise delivering high-scale SaaS & ERP systems with proven impact (60% performance improvement, major architecture redesigns).
- Led migration and unification of component libraries (MUI to Ant Design) across teams.
- Full-stack development mindset with solid backend experience in Node.js, Express.
- Emergency problem-solver: Resolved a critical 3-month technical blocker in under 4 hours.

TECHNICAL SKILLS

Core: React, TypeScript, Next.js
State Management & Data Fetching: Zustand, Redux Toolkit, React Query
UI Systems: Ant Design, Tailwind CSS, Material UI
Architecture & Performance: Frontend Architecture, Performance Optimization, Scalable Systems
Backend (Supporting): Node.js, Express
Additional: MongoDB, REST APIs, SEO Basics

WORK EXPERIENCE

Senior Front-End Developer | Lumofy | Remote

Jul 2023 – Feb 2026

- Improved UI performance of the Learning Experience Platform (LXP) by 60% through rendering optimization, state management refactoring, and component redesign.
- Architected and maintained core SaaS modules including Learning Pathways, Appraisals, Competencies, 360 Reviews, and Performance Cycles.
- Designed and built intuitive drag-and-drop builders for Courses, Content, and Certificate Templates, enabling non-technical admins to create content without developer support.
- Led two major front-end architecture redesigns that increased code maintainability and long-term scalability.
- Drove the migration from Material-UI (MUI) to Ant Design, unifying the component library and improving design consistency across teams.
- Implemented Zustand for global state management, simplifying complex logic and boosting performance across multiple modules.
- Delivered AI-powered features such as content recommendations, AI-generated learning content, and competency analysis.
- Contributed to a major rebranding initiative improving product positioning.
- Supported growth that helped attract strategic investors (Mumtalakat, Tamkeen, Gulf Air Group) and contributed to reaching $1M in revenue.

Senior Front-End Developer | Dexef | Cairo, Maadi (Short-Term Contract)

Mar 2023 – Jul 2023

- Built comprehensive ERP financial modules using React, TypeScript, React Query, and DevExtreme, applying functional programming patterns to ensure high performance with large datasets.
- Integrated front-end components with backend services built in C# and .NET.
- Resolved a 3-month-old critical technical blocker within 4 hours by implementing custom JavaScript actions on widgets inside a drag-and-drop page builder, unlocking key dynamic functionality.
- Utilized Azure DevOps for agile planning, task tracking, and collaboration, contributing to faster delivery cycles.

Mid Front-End Developer | Rowoad | Cairo, Nasr City

Aug 2022 – Feb 2023

- Developed and maintained multiple web platforms for Saudi Arabian clients, ensuring responsive design and cross-browser compatibility, primarily using the Mantine UI library.
- Delivered Mezan (legal consultation), New Vision Center (health training), All Size (e-commerce), and Oshna (real estate) with integrated admin dashboards.
- Collaborated with cross-functional teams to deliver projects on time and within scope.

Back-End Developer | Qumra | Cairo (Part-Time)

Mar 2022 – Aug 2022

- Engineered full-stack solutions using Remix Run for four client projects: Adum Car, Sunivage, Pyramids, and Best Cleaner — delivering backend systems and admin dashboards.
- Reduced API response times by 25% through optimized data fetching and query restructuring.

Junior Front-End Developer | New Concept | Cairo

Feb 2022 – Jun 2022

- Single-handedly migrated the entire educational platform from React to Next.js within one week, improving SEO and performance.
- Created reusable custom React hooks that accelerated development speed by 75% compared to standard workflows.
- Built front-end features using React, Next.js, and Ant Design, integrating with Node.js and MongoDB backend.

Junior Front-End Developer | Dipdux Analytica, LLC | Remote

May 2021 – Aug 2021

- Delivered multiple front-end projects and designed the company dashboard using React and Next.js, ensuring a modern, responsive, and high-performance experience.
- Contributed to Mentorna, a mentorship platform connecting users with top mentors across the Arab world.

KEY PROJECTS & TECHNICAL CONTEXT

Lumofy – Learning Experience Platform (LXP)
High-scale SaaS corporate learning platform with AI-driven recommendations and complex drag-and-drop content builders.
Stack: React, TypeScript, Zustand, Ant Design, Django REST Framework

Dexef – Unified ERP Suite
All-in-one ERP handling accounting, inventory, restaurants, hotels, and airport operations with banking-grade financial modules.
Stack: React, TypeScript, React Query, DevExtreme, C# (.NET), Azure DevOps

Dexef – Drag-and-Drop Page Builder
Widget-based dynamic dashboard builder enabling custom page creation via drag-and-drop within the ERP system.
Stack: React, TypeScript, DevExtreme

New Concept – Educational Engagement Platform
Interactive learning SPA with gamified challenges (lessons, quizzes, competitions), fully migrated from React to Next.js.
Stack: React, Next.js, Ant Design, Node.js, Express, MongoDB

EDUCATION

Bachelor of Electronics Engineering
Faculty of Technology and Education, Helwan University, Cairo
2021 – 2024 (Expected Graduation: May 2024)

Diploma in Computer Systems
Higher Institute of Industrial Technology, Alexandria
2018 – 2021

LANGUAGES

Arabic: Native | **English**: Professional Working Proficiency

COURSES & CERTIFICATIONS

- React Nanodegree | Udacity (Egypt FWD) | Apr 2022 – Jul 2022
- Node.js Full Course | Information Technology Institute (ITI), Ministry of Communications | Sep 2019 – Jun 2021
